

Aerospace Homework

OK, week two. Hope we're all still healthy and finding some interesting things to do! Never waste time, it's just too precious. Getting involved in the Arts, Writings, Technology, or Sports are just some of the ways we can make life interesting, but you have to take that first step! So take my advice and keep active and keep learning and you will be happy you did!

What I posted for the week of 3/23 – 3/31/20 applies for all the weeks that we are out of school. Let's try to get one assignment in for each week we're out. For instance, you can do an on line research, **or** a construction of something like a lunar module, **or** a drawing of something like a Mars' settlement - you pick, but only one of these per week. If you pick to do a project, and it turns out to be a pretty extensive one, then I can count that for 2 weeks instead of one. The main thing is to have fun while you're learning something new in Aerospace!

Enjoy, Mr. Larivee
