

Residential Construction I

I will post these assignments in Edmodo every Monday to be completed anytime during the week.

Week of 4—20 to 4—24

Remember to access this in Edmodo. The assignment will be posted there for you to complete.

Watch this YouTube video and respond to the questions:

<https://www.youtube.com/watch?v=1uTEHRs6pCk>

- When he is prepping his ground for the concrete, what things did you recognize that we did in our pour?
- Why does he use a level when setting his forms? Even though he is using a level, why are the forms still not level?
- What similarities did he have to us when he was mixing his concrete with the power mixer?
- If you had the choice of using an 80 lb. or 60 lb. bag of concrete to mix, which bag would you prefer to use for mixing with?

Week of 4—27 to 5—1

Remember to access this in Edmodo. The assignment will be posted there for you to complete.

When you entered this class, you most likely had a particular project you wanted to do, make, or build.

- What project did you want to make and **why**?
- Find a video on YouTube of this project you wanted to do and place the link in your response.
