

ROBOTICS II Lesson for 11-15 May 2020

Hey Guys!! Hope you are doing well. I am putting this together a week in advance, so not sure how you did leading up to this week's lesson.

We will continue with the same circuit as last week. For help getting into TinkerCAD, you can look at the previous lessons.

This circuit is still built as Lesson3. You can also access it with:

<https://www.tinkercad.com/things/9ArgkDwDfSv-ingenious-amur/editel?sharecode=0GC41gsL4Wkaneg45vw5sb7rsJc13AtKSIJ3ziGoYdg>

This week, I would like you to wire in the blue LED and resistor, and add it to the code:

Red fade on, Yellow fade on, Red fade off, Green fade on, Yellow fade off, Blue fade on, Green fade off, Blue fade off.

This is the last one for the year, but I will try to keep posting stuff to the BWTC web site over the summer. If there is anything you would like to learn, please let me know so I can add it, both for the summer and next year – marvin@sanjuandf.com or 505-609-8551.

Seniors, I will miss you. Hopefully we can get together for some kind of celebration after things start to clear up.

Stay safe!

Mr. C
