

# ROBOTICS II Lesson for 20-25 April 2020

Hey Guys!! Hope you are doing well. I feel really bad for all of you living on the Nation. Now that I think about it, I only left the house once over the weekend for a grocery run.

Mr. Larivee have been working to find a way to do some hands-on lessons, and it has helped me design some new circuits I need for a project I am working on. He set up a classroom on <https://www.tinkercad.com/joinclass/FL1I5KQPLBVF> for us to use.

Enter your nickname and click **That's me!**

Your nicknames are:

kayleigh0136

destiny8172

elora5118

dempsey2925

latoya3510

martin2663

demetrius8302

rafeal7520

colyn3698

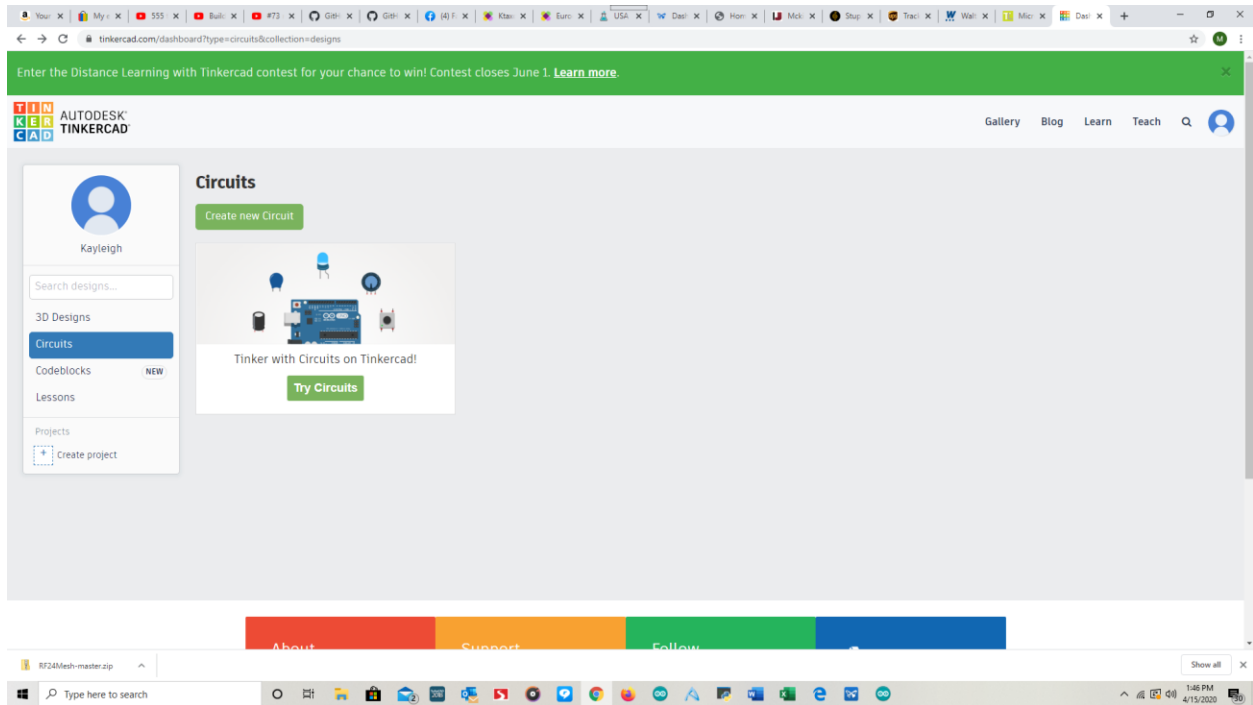

shiyazh2943

nyla5633

kameron6267

savannah7339

tristen0027

Then click **Try Circuits**. It will then give you examples to try and learn how it works. Then use **Create New Circuit** to try some designs for yourself. I will be adding lessons to the class for next week.

I hope this is better than watching the **Youtube** videos!

Stay Safe and Healthy,

Mr. C.
